

Compressed Natural Gas Fueling Station (\$750,000). I would ban earmarks as we know them, but as long as these earmarks are available, I'm going to apply for them in an effort to pursue federal funding opportunities for my district. For non-defense projects in the current earmarking system, I work closely with local governments, civic organizations, non-profits and business development authorities to identify and prioritize projects important to local communities in Georgia's Eighth Congressional District (and sometimes elsewhere). I only request funds for projects authorized by law for federal funding and do not do so for private parties or entities. The project will fund the construction of a compressed natural gas fueling station. This is a valuable use of taxpayer funds because it will reduce not only foreign oil dependency but also pollution in the city. Beneficiary: City of Moultrie, City Hall, P.O. Box 3368, Moultrie, GA 31776.
